

World Class Pharmaceutical Packaging
& Containment Systems

EZI-FLOW™ CSV

High Containment Transfer System

A Unique and Highly Effective Solution for
Contained Transfer of Sensitive or Hazardous
Chemical and Pharmaceutical Products.

Suitable for Powders and Solids, Steriles, Tablets
and Wet Cake.

Containment Level

OEB5

"Simple, reliable containment."

EZI-FLOW™ CSV4

High Containment Transfer System

Why choose Ezi-Flow?

- Fully contained system for the safe and effective transfer of hazardous & toxic media.
- Full bore system for total discharge & maximum yield.
- Scalable - available in a range of sizes.
- Highly competitive & cost effective.

Why is it different?

Spigot seals against passive valve to create containment.

The Ezi-Flow process

Ezi-Dock Chargebag with Passive Valve attached (cannot be opened independently).

Choke Clip or Butterfly Valve is used to prevent product from flowing and contacting Passive Valve slider plate.

Active half of the CSV System ready for the Passive to be docked in place.

Ezi-Dock Chargebag with Passive Valve locates in to Active half and secured by integrated mechanical interlock.

1

4

Active Slider is retracted opening Passive & Active sliders at same time.

2

5

Active half lowered over integrated Spigot sealing against Passive Valve creating full containment.

3

6

Choke Clip is removed allowing product to flow.

The process is followed in reverse to achieve a clean & contained disconnect.

Chargebags available in sizes: 2/5/10/15/25/40 litre

Pharmaceutical Chargebottles available in sizes: 15/25/30/40 litre

Optional Hicoflex style adapter mount

Ezi-Dock™ Systems Limited is a 100% privately owned company based in Nottinghamshire, UK. Relying on a deep understanding of the day-to-day problems of waste and contamination faced by businesses involved in powder and liquid handling, Ezi-Dock™ designs and manufacturers unique products and solutions for the packaging industry, as well as end-users.

Specializing in the handling and delivery of foodstuffs, oils & fats, pharmaceuticals, printing inks and speciality chemicals. Ezi-Dock™ exports its products world wide and, with distributors based in the USA, Australasia, Ireland and Japan, can ensure fast and reliable product delivery and service.

Ezi-Dock™ works with the World's largest pharmaceutical companies right through to small organic food producers who need cost-effective handling solutions.
